DETAILED ACTION

The status of the Claims is changed as follows:

The Restriction requirement is withdrawn. Claims 91-94 are rejoined with Claims 95-98 (*In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b); 1184 O.G. 86; March 26, 1996).

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Sonia Guterman on 7 June 2006.

The application has been amended as follows:

Please insert as the first line of the specification:

"This application claims priority under 35 USC § 119 to US Provisional serial number 60/178,652, filed 1/28/2000."

Please remove the phrase "conservative variants thereof" from claim 91.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The fusion proteins of the instant Application comprise novel and nonobvious chimeric neuropeptide-Y receptors. The claims of the instant application are directed to a genus of closely-related receptor polypeptides with unique ligand selectivities and G-protein-binding properties. The claims are free of the prior art as the polypeptides have not been studied in the prior art and have been disclosed only in the provisional application from which the instant Application derives priority. The specification provides experimental evidence of utility and enablement under 35 U.S.C. 112, first paragraph. The claims also meet 35 U.S.C. 112- second paragraph requirements because the claims point out and distinctly claim the invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
